

Sprint Planning (Sprint 1)

Earl James Q. Rentillo

*Sprint Goal: To develop a sitemap and wireframe
backed with a Product and Sprint Backlog*

Product Backlog

User Story	Acceptance Criteria	Story Points	Value Points	Value for Money
<i>As an administrator, I want to follow an iterative process of web developing, particularly through Scrum.</i>	<i>Capability to be revised multiple times with minimal impediments.</i>	5	55	11
<i>As an administrator, I want to create a sitemap so that the hierarchy and flow of the website would be visualized.</i>	<i>Approval by the Scrum master. Alignment with the Sprint Goal.</i>	1	8	8
<i>As an administrator, I want to create a wireframe so that the website and its elements would be visualized.</i>	<i>Approval by the Scrum master. Alignment with the Sprint Goal.</i>	1	8	8
<i>As an administrator, I want to be able to filter out and delete posts and comments so that I could moderate content.</i>	<i>Admin can delete post and/or comments.</i>	1	5	5
<i>As an administrator, I want a database developed so that data can be stored for the blogs and other site content.</i>	<i>Users can click on the navigation buttons to redirect to other site pages.</i>	5	13	2.6
<i>As a user, I want a navigation panel so that I can easily navigate each of the website pages.</i>	<i>Users can click on the navigation buttons to redirect to other site pages.</i>	2	5	2.5
<i>As a user, I want to be able to comment and like on the posts so that I may interact with the admin and other users.</i>	<i>Users can input comments below the post and/or like the post.</i>	2	5	2.5
<i>As a user, I want a way to share the page contents so as to promote the website.</i>	<i>A share button is available for each post, which when clicked shares the content across social media</i>	2	3	1.5
<i>As a user, I want a discussion forum so that there is I may discuss with other users certain topics about the website.</i>	<i>Users can input thoughts into the forum and remove it anytime.</i>	2	3	1.5

Sprint Backlog

User Story	Tasks	Hours
<i>As an administrator, I want to follow an iterative process of web developing, particularly through Scrum.</i>	<i>Research on Scrum</i>	2
	<i>Implement Scrum Events throughout the Sprint progression</i>	-
<i>As an administrator, I want to create a sitemap so that the hierarchy and flow of the website would be visualized.</i>	<i>Research on sitemaps</i>	2
	<i>Choose a software and do an initial sketch of the sitemap</i>	2
	<i>Finish the sitemap sketch and digitalize through computer software</i>	2
<i>As an administrator, I want to create a wireframe so that the website and its elements would be visualized.</i>	<i>Research on wireframes</i>	1
	<i>Choose the wireframe type to be sketched and the software to be used</i>	1
	<i>Sketch a low fidelity wireframe on paper</i>	2
	<i>Transfer the sketch into a computer through a software</i>	2

Daily Scrum

WEEK 1

Questions	Monday	Tuesday	Wednesday	Thursday	Friday
<i>What will you do today?</i>	Initial research on Scrum	Continue research on Scrum	Research on Scrum Events	Research on Scrum Artifacts	Recalled the research gathered this week
<i>What did you do yesterday?</i>	Prepared for Sprint Planning	Familiarized with basic Scrum concepts	Finished initial research on Scrum	Finished initial research on Scrum	Finished initial research on Scrum
<i>Are there any impediments in your way?</i>	None	Poor internet connection	None	None	None

WEEK 2

Questions	Monday	Tuesday	Wednesday	Thursday	Friday
<i>What will you do today?</i>	Conceptualize a website topic	Finalize website concept and establish Sprint Goal	Research about sitemaps	Sketch a sitemap for the website	Finalize the sitemap sketch and transfer into a computer
<i>What did you do yesterday?</i>	Recalled last week's research	Brainstormed on what website to create	Finalized website concept and Sprint Goal	Gained insights on how to create a sitemap	Made a sitemap sketch
<i>Are there any impediments in your way?</i>	None	None	None	None	Power interruption

WEEK 3

Questions	Monday	Tuesday	Wednesday	Thursday	Friday
<i>What will you do today?</i>	Initial research on wireframes	Finalize website concept and establish Sprint Goal	Sketch a wireframe of low fidelity	Finalize the low fidelity wireframe through a computer software	Refined the sitemap and wireframe. Checked for errors.
<i>What did you do yesterday?</i>	Created a sitemap	Gained background knowledge on wireframes	Research about sitemaps	Finished sketching a low fidelity wireframe	Finalized the wireframe
<i>Are there any impediments in your way?</i>	None	None	None	None	None

Sprint Review

Sprint Goals

The goal of this Sprint is to come up with a website concept, then establish the product and Sprint backlogs thereafter. Furthermore, the Sprint is also expected to accomplish the sitemap and wireframe for the website as to visualize the website and its hierarchy.

Product Overview

The product is a blog type website wherein users can view and read the literary pieces of the administrator. The website contents can be updated time to time, some of these pieces being general blogs, poetry, and prose.

Status Overview

A sitemap and wireframe have been established at the end of the Sprint. Additionally, a product backlog was created to envision the roadmap that will be taken as the website development progresses.

Impediments

In terms of impediments, there were no instances of such which might have significantly slowed the Sprint progression. Only poor internet connectivity and power interruption occurred at a rate of which can be neglected.

Feedback

A revision was made to better the sitemap. Otherwise there were no negative feedback received.

Sprint Retrospective

What went well:

- The Sprint was accomplished within the given timeframe.
- The sitemap and wireframe were finished with minimal revisions.
- The Product Backlog was created realistically through Fibonacci points.
- The Sprint Backlog was kept in line with the Product Backlog.
- Time was utilized productively through Daily Scum.

What to improve:

- Allocate more time on planning and research.
- Work on improvements and revisions for the Product Backlog.
- Align User Stories closer to the Sprint Goal.

Actions to take:

- Plan ahead and allocate more time on research, while keeping gestation.
- Revise the Product Backlog on future Sprints.
